

# CRANIOCORPOGRAPHY

## Fast and simple investigation

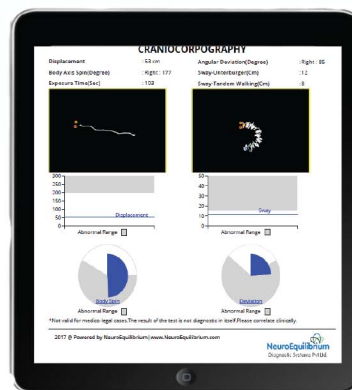

NeuroEquilibrium™ Craniocorpography (CCG) is a neuro-otological investigation to evaluate the vestibulospinal reflex, which is responsible for maintenance of balance during gait testing.

The protocols evaluated by this screening include

- Romberg test
- Tandem walking
- Unterburger's test, which evaluates the following parameters
  - Displacement
  - Sway
  - Angle of deviation
  - Body axis spin

## Product specifications

- Real time data analysis
- Fully integrated and computerized
- Patent pending

## Cloud integration for anywhere access

• Data from the tests is automatically and seamlessly saved on the cloud and can be accessed over internet from anywhere in the world.

• Allows for easy restoration of documentation in case of local system crashes.

**Neuro  
Equilibrium**

NeuroEquilibrium provides a comprehensive management of vertigo and balance disorders by breakthrough innovations. Our strategy is to set up specialized advanced vertigo and balance clinics across India, Asia and Africa in collaboration with leading ENT & neurology clinics to treat the huge numbers of vertigo and balance disorder patients through:

- Neurotological evaluation with our suite of world class diagnostic equipment
- A specialist neurotological team
- NeuroEquilibrium Assessment Platform

It is India's first robust diagnostic protocol to help doctors diagnose and treat vertigo cases easily across continents.

Let's **get together** to  
restore **balance**
